 What's the meaning of life? Does human existence have an overarching goal? What should I care most about? How can I make sure I don't waste my life? These are some of the most important questions that anyone can ask, and in this course we will explore them together. To help us do that, we'll draw on the resources of one of the best cities in the world - New York City. During our time in New York, we will have conversations with fascinating people, experience excellent art and architecture, discuss insightful readings, explore the city, and reflect on life's deepest questions. Also listed as TH 299. Offered Jan term, odd years in New York City.
- PH 301 Symbolic Logic** 3
 This course attempts to formalize the structure of proper logical reasoning through the use of an artificial symbolic language that assists in recognizing proper from improper argumentation. The main goal in this class is to begin mastering this symbolic language with the goal of learning to reason well. We will begin by looking at the nature of propositional statements, the truth-functional connectives they use, and translating statements made in our natural language to this artificial symbolic language. Then we will turn to the construction of arguments. We will learn to recognize valid from invalid arguments by constructing truth-tables to derive valid arguments using universal logical truths. Fall semester, even years.

PH 329H God, Knowledge, and Language	3
This course explores a number of issues at the intersection of postmodern thought, theology, and Anglo-American (analytic) philosophy. We'll begin with the question, What is the nature of truth?, a question that is sharply to be distinguished from the following two: . Which claims or propositions are true? . How do we know what is true? After a detailed inquiry regarding the nature of truth, we'll consider the extent to which it's sensible to think that some theological claims are true. In this connection, we'll examine classical and contemporary views of the Divine nature. We'll then proceed to consider postmodern views of knowledge and interpretation, taking Descartes' philosophical project as our backdrop. During this part of the course, we'll examine recent debates between postmodernists and their critics (these debates take place both within and outside of Christian circles). Finally, we'll consider the question, Can Christian belief be reasonable in today's intellectual climate? This inquiry will require a deep investigation of the nature of human rationality and the prospective sources for reasonable belief. Periodic Offering.
