The Whitworth University Psychology Department is committed to academic rigor and sensitive human service through the promotion of the scientific study of mind and heart. As part of a Christian liberal arts institution, we seek to train and produce responsible, enlightened citizens who think critically and contribute actively to the field of psychology. Following a scientist-practitioner model, the curriculum is designed to develop both breadth and depth of knowledge in core areas of psychology. Students engage in research and practice that encompass foundational and advanced requirements and electives, culminating in dual senior capstone experiences. Students apply their learning as they design their own research projects, critically evaluate scientific information and other claims, and reflect on the integration of psychology with Christian faith and other worldview perspectives. They gain experience working in the community at a practicum placement of their choice, and they have the opportunity to travel to destinations that bring their classroom learning to life. We offer an enduring foundation in the investigation and understanding of human behavior, emotion and mental processes, in an atmosphere that nurtures relationships among people of diverse backgrounds and offers mutual support and friendship among faculty and students.

The learning outcomes of this major prepares students to do the following:

a. Demonstrate knowledge, understanding and application ability of psychological principles within personal, social and organizational realms.

b. Demonstrate critical thinking, skeptical inquiry and scientific methods to solve problems related to behavioral, mental and emotional processes.

c. Act ethically, understand how their worldview informs their approach to psychology, and appreciate diversity.

d. Demonstrate competence in oral, written and interpersonal communication.

e. Implement psychological and personal knowledge, skills and values in vocational pursuits that meet personal goals and societal needs.

## Courses

**PY 101 Introductory Psychology**
- Use of scientific method of examining human behavior. How to deal objectively with questions about behavior. Topics include biological psychology, development, perception, states of consciousness, learning and memory, motivation and emotion, disorders and therapy, social psychology and human diversity. Fall and spring semesters. Periodically offered on-line during summer semester.

**PY 196 Psychology and Well-Being**
- Students will explore and practice empirically based principles of well-being. This includes exploring how topics such as exercise, sleep, mindfulness, and stress impact well-being.

**PY 200 Psychopathology and Film**
- Introduction to social issues of psychopathology using film. Exploration of various symptoms, disorders, interpersonal dynamics, influences, treatments and legal and ethical issues. Prerequisite: PY 101. Jan Term. Periodic offering.

**PY 201 Psychological Statistics**
- Introduction to the process of research and the basic principles of statistics. Focus on data collection and analysis. Prerequisite: PY-101. Fall and spring semesters.

**PY 206 Serial Crime in the Pacific Northwest: Psychopathology, Evil, & Justice**
- This course introduces the phenomenon of serial crime as an avenue for exploring definitions and varieties of psychopathology and its intersections with criminality. Primary texts include works of true crime emphasizing key narratives about pathology, evil, and the meaning of justice for criminals and their victims/survivors. A field trip to Seattle-area locations will assist students in understanding the context in which serial crime occurs, and what our societal response to it might be, with an emphasis on victim advocacy and vocation. Periodic summer offering.

**PY 210 Developmental Psychology**
- The biological, psychological and cultural influences on human behavioral development from conception through death. Fall and spring semester.

**PY 211 Lifespan Development**
- For Continuing Studies Students only. An examination of developmental psychology, addressing the biological, psychological, social, and cultural influences on human development across the lifespan.

**PY 225 Cognitive Psychology**
- An examination of important concepts in Cognitive Psychology, including attention, memory, language, problem solving and decision making, and cognitive neuroscience. Special consideration will be placed on important experimental findings and the applications of cognitive principles in education, the legal system, counseling, marketing, and other fields. Prerequisite: PY 101. Spring semesters.

**PY 227 Personality and Individual Differences**
- This course explores historical and current perspectives on the nature of human personality, including personality development, assessment, and change. Other important dimensions along which humans can vary, such as gender, culture, intellectual ability, and genetic/biochemical composition, are also considered. Prerequisite: PY 101. Fall and spring semester.

**PY 236 Biological Psychology**
- An examination of the biological underpinnings of human thought, feeling and action. Considers neuronal and hormonal communication, along with behavioral genetics and evolutionary psychology. Prerequisite: PY-101. Fall or spring semester.

**PY 241 Social Psychology**
- An attempt to understand how an individual’s thoughts, feelings, and behaviors are influenced by the actual, imagined, or implied presence of others. Trends and findings of current research and its limitations. Prerequisite: PY 101. Fall or spring semester.
PY 301 Research in Psychology
Introduction to conducting psychological research. Topics include ethics, hypothesis formation, descriptive research, experimental design, reliability and validity. Students will practice skills learned in PY201 through data collection and analyses. Prerequisite: Take PY 101 and take PY 201 or MA 256. Fall and spring semesters.

PY 328 Perspectives on Moral Development
The purpose of this course is to explore various theoretical perspectives and research studies regarding the conception and study of morality and moral development. The primary questions addressed in the course are: (a) What does it mean for us to think, feel, and act morally? (b) In what ways do our moral cognitions, emotions, and behaviors change from childhood to adulthood? (c) In what ways do our moral cognitions, emotions, and behaviors remain stable from childhood to adulthood? (d) How are these cognitions, emotions, and behaviors conceptualized and studied by various theoretical perspectives? (e) How do past and present research inform our understanding of moral development?

PY 330 Psychology of Poverty and Social Class
Examines how social class affects cognitive, emotional, and social development; how the more affluent make attributions of behavior and circumstances of the poor; and how these attributions affect helping behavior and psychological outcomes. Prerequisite: PY 101. Sophomore level and above. Also listed as CE 330. Periodic.

PY 335 Exploring Central Nervous System Disorders
Explores different diseases and disorders in the central nervous system (CNS). Special focus is given to current methods used to study the mechanisms that underlie pathophysiology, novel treatments strategies, and bigger picture perspectives on each condition. Current research is placed within the context of patient symptoms, experiences, and spiritual and societal implications.

PY 337 Books, Brains, & Beliefs
An in-depth assessment of three neuropsychological conditions through discussion of popular literature. Possible topics could include depression, Alzheimer’s disease, bipolar disorder, developmental disabilities, or others. Considers the symptomatology and basic mechanisms of these conditions within the context of multiple viewpoints and faith-based perspectives.

PY 340 Love, Altruism and Forgiveness
An examination of why people experience love and behave altruistically. Topics include the emotions of love and hate, empathy, forgiveness, hope, and courage; social categorization; and self-other relationships. Prerequisite: PY 101. Jan term. Periodic offering.

PY 341 The Psychology of Love
For Continuing Studies students only. An examination of how and why people experience love. Topics include theoretical perspectives on love, altruism, emotion, love vs. hate, empathy, forgiveness, hope, courage, self-other relationships, and more.

PY 345 Forensic Psychology
Examines the relationship between psychology and the law, police psychology, investigative psychology, legal psychology, and criminal psychology. Special consideration will be placed on how concepts such as developmental, clinical, cognitive, and social psychology can be applied and integrated into the legal system. Prerequisite: PY 101.

PY 350 Psychology and Christian Faith
Explores the integration of psychological research and Christian faith. Examines potential tensions and resolutions in integrating psychological and Christian approaches to understanding development, maturity, conversion, and counseling. Prerequisite: three courses in psychology, including PY 101. Periodic.
PY 353 Psychological Assessment
Provides a survey of fundamental goals and principles of psychological assessment in both theoretical and applied contexts, including identifying the primary constructs assessed by psychologists. Students will explore theories, techniques, applications, and limitations of assessments and sample commonly used psychological screenings/tests. Includes overview of psychometric principles: test reliability/validity, and consideration of ethical and professional issues. Prerequisites: PY 101 and PY 227. Spring semester.

PY 355 Helping Skills
Learn to use concepts and models of research-based helping skills. Skills-based and experiential course format providing first-hand experience in simulated role-play helping situations. Prerequisites: PY 101 and PY 227. Fall semester.

PY 357 Developmental Psychopathology
Explore the developmental psychopathology perspective and how it is used to understand selected disorders of childhood. Review of the description, assessment, epidemiology, etiology, and treatment of commonly diagnosed behavioral and emotional disorders in childhood. Prerequisite: PY 101 & either PY 210 or PY 358. Fall or spring semester.

PY 358 Psychopathology
Study of behavior categorized as mental illness or mental disorder. Introduction to the DSM and treatment. Pertinent issues in genetic and neurochemical factors, family interactions, and other social relationships examined. Prerequisites: PY 101. Fall and spring semester.

PY 359 Theories of Counseling
Introduction to the field of counseling, including major theoretical orientations, both historical and recent: psychoanalytic, behavioral, humanistic/existential. Prerequisites: PY 101 and PY 227 (PY 358 recommended). Fall and spring semesters.

PY 360 Psychology of Consumerism
Explores the effect of consumer culture on the lives of individuals. Topics include identity formation, psychological motivations for materialism and consumption, how consumerism shapes relationships, and its effect on the environment. Antidotes such as voluntary simplicity, gratitude, and mindfulness are also discussed. Spring semester.

PY 365 Psychology of Emotion
Focuses on the scientific study of emotion including how and why people express emotions; how and why people experience emotion (with an emphasis both on physiology and cognition); the development of emotion; and the effect culture has on both the expression and experience of emotion. Students are introduced to a variety of research methods in the field including facial judgment tasks, psychophysiology, diary studies, and cross-cultural research methods.

PY 370 Sports Psychology
Exploration of the many facets of sports psychology from both a theoretical and practical standpoint. Topics include characteristics of successful athletes, motivation, regulating anxiety and stress, aggression, team cohesion, leadership styles, and coaching youth sports. Recommended that PY 101 be taken previously. Jan Term.

PY 376 Health Psychology
The study of biological, psychological, and sociocultural perspectives influence an individual’s overall health including; behavior change theory and application, coping and stress management, psychoneuroimmunology, the impact of personality and cognitive patterns, vision and goal development to facilitate health behavior change. Cross-listed: HS-376.
Psychological Trauma and Resilience is an upper-division course designed to explore the nature of trauma and the various outcomes that suffering can produce. This course will first explore, at a micro level, the individual factors that can either hinder or facilitate emotional, psychological and spiritual growth before, during and after great suffering. Students will explore the various ways humans from a variety of cultures have interacted with suffering from Old Testament to current treatments for PTSD and research on hardiness and Post Traumatic Growth. We then survey the major conflicts the American Military has been involved in from the Civil War onward, comparing and contrasting, at a macro level, the variables that led to either increased resiliency and growth, or psychological degradation. Prerequisite: PY-358

The Nature of Trauma
For Continuing Studies students only. This course is designed to explore the nature of trauma and its individual, familial, community, cultural, and global impacts. Starting with an in-depth exploration of trauma and its definition, this course will then explore trauma’s prevalence in American society, how trauma reshapes both body and brain, and finally will explore various trauma recovery approaches and treatments.

Research Assistantship
PY 400 Senior Pre-Practicum
Serves as preparation for Senior Practicum course. Topics include exploring student post-baccalaureate goals and interests, selecting a practicum site, and preparing for the practicum experience. Senior psychology major. By instructor permission only. Prerequisite: PY 400. Fall semester.

PY 401W Senior Thesis
Final learning/evaluation situation for psychology majors. Design and carry out independent research project. Seminar format. Prerequisite: PY 201 and PY 301. Fall semester.

PY 402 Senior Practicum
Placement in community agency or organization. Applications of psychological concepts and analysis of individual experiences in a seminar format. Prerequisite: PY-400 and senior psychology major. By instructor permission only. Spring semester.

Research Colloquium
Gain firsthand experience of the process of researching, critiquing, and writing in a collaborative small-group format under the guidance of a psychology faculty member and their research. Prerequisite: PY 101 and senior psychology major. Selection by instructor. Periodic offering.

Advanced Senior Thesis
Students will refine their original senior research project for publication in a professional journal or presentation at a regional or national professional conference. Prerequisite: PY 401W and approval of a faculty sponsor. Spring semester.
